## PROJECTS

During my studies, I have undertaken several personal projects to apply my skills, expand my knowledge, and foster continuous learning. All these projects demonstrate technologies that I know including HTML/CSS, JS, React. Currently, I am developing a React Native app for learning English.

## EDUCATION

**National Aviation University, Kyiv**      Septemer 2020 - August 2024  
123, Computer Engineering

I graduated from the National Aviation University with a bachelor's degree in computer engineering. I am most interested in studying object-oriented programming, web programming, and AI.

## WORK EXPERIENCE

Fullstack developer      June 2023 - June 2024

### Mealco, NYC

Started as an intern, I handled numerous tasks and projects. A major accomplishment was developing automated tests, honing skills in Git, implementing CI/CD processes. After that, I took a Junior Developer position and wrote cloud functions, created frontend features, and worked on UI improvements. I was actively involved in designing and implementing new features, as well as fixing bugs and optimizing performance.

Teacher HTML/CSS      March 2023 - June 2023

### IT school "STEP", Poltava

I secured a position as an HTML/CSS teacher at a local computer school. For three months, I taught children from 8 to 15 years old the basics of creating websites. It was an interesting and valuable experience for me, as I trained my communication skills, improved my technical knowledge, and created many interesting projects together with children.

Site administrator      July 2022 - September 2022

### State Tax University, Irpin

Work as an administrator of the website of the State Tax University in Irpin. My responsibilities included redesigning certain parts of the site, creating new pages, filling them with content, and managing access for university staff. I acquired technical skills during this work, such as site content management using Joomla! and redirecting links from the old site to the new one.
